

# Car-O-Liner's

## global Volkswagen approvals

Volkswagen AG, parent of global brands Audi, Porsche, Skoda, Seat, Lamborghini and, of course, Volkswagen, has several approvals in place for a number of Car-O-Liner products, many of which have been on display at recent training and education events in both Sydney and Melbourne. Central to the range of VAS approved products are:

### **Car-O-Data, the most advanced electronic measuring system on the market, combines with Vision2**

Vision2 guides the entire repair process and performs automatic centring, measuring and documentation. Its user-friendly interface is so easy to use that technicians can measure damaged vehicles 20 percent faster. The photo-based and easy-to-learn Vision2 presents an intuitive workflow. It is integrated with Car-O-Data, the world's largest vehicle database, with over 16,500 measured vehicles. Continuous updates via internet ensure that your database will always be up-to-date. All these features working together contribute to reduced cycle times and more efficient diagnosis.

### **CMI 3000II simplicity and state-of-the-art technology**

The CMI 3000II is the latest generation of MIG/MAG welding machines. Combining simplicity with state-of-the-art technology, the CMI 3000II is a versatile, upgradable MIG/MAG welding machine using flash-card and inverter technology. The digital intelligence in the Car-O-Liner CMI 3000II, 400V makes it easy to find the program relevant to the individual car, even those in hardenable aluminium. And since the joining of special alloy thin plates

requires a gentle process, this has been built into the memory of the CMI 3000II. The results speak for themselves; the corrosion and strength properties of the material are maintained, and only minimal post-treatment is required.

### **Quick42 quick benefits for your bottom line**

Quick42 is a phenomenal, multi-functional bench designed to manage every type of damage productively and accurately. Compatible with the Car-O-Tronic Vision2 X3 measuring system and EVO Universal Anchoring and Holding System, the Quick42 alignment bench system offers a complete repair solution, providing technicians with a time-saving process to easily diagnose, fixture, and repair. Maximising repair capabilities and quality enhances body shop output and increases customer satisfaction.

### **BenchRack bench efficiency with scissor lift versatility**

The unsurpassable BenchRack combines drive-on convenience with a hydraulic lift and removable ramps. Add to this the tilt feature, which makes loading easier when approach space is limited, and you have the most versatile repair bench on the market and will be able to repair each collision damaged vehicle that enters your shop, from slight cosmetic work to full-frame repairs. The BenchRack systems are designed for any type of unibody or full frame vehicle, from small cars to light trucks, vans and SUVs.

### **Speed bench is light but not a lightweight**

The Speed bench is one of the most effective lighter weight benches on the market. There isn't much that this bench can't tackle in the way of cosmetic damage repair. It only takes

few seconds to set up and it has a convenient draw aligner that can be turned 180 degrees around the platform at one end and tilted 90 degrees horizontally. Once pulling begins, the draw aligner finds the correct position. For more pulling power, there is the Speed Plus bench, which allows the attachment of two draw aligners, one at either end.

### **Car-O-Tronic Vision2 advanced system for upper and lower body measuring**

Experience Car-O-Tronic Vision2 – the fastest, most accurate and easiest to use electronic measuring system on the market today! The sensor-equipped measuring slide delivers real-time data three times per second to the advanced and easy-to-use software. The Car-O-Data, the world's most comprehensive vehicle database, allows you to accurately and quickly target measuring points.

Frank Ponte OEM Equipment Manager sums up the technology: "We are proud to be the collision repair industry leader with OEM certifications and approvals. Having several approvals across the world's largest car manufacturer, the Volkswagen Group is an endorsement of our brand."
